

IT Consulting:

Disaster Recovery Services - Business Impact Analysis

What would a business interruption cost you? Determine which areas need review, and help you build a business case to support them.

The next step in understanding your disaster recovery business impact

The ability to stay up and running in the face of a natural disaster, fire, malicious attack or even a blackout can be crucial to the long-term survival of your business. Businesses often underestimate the risk to their business or believe DR to be too expensive. You need to know your business impact. Analysis allows you to learn the cost of an outage, determine areas in need of further review, and help you develop the business case for Disaster Recovery.

Take the next step with Dell

The Dell IT Consulting Disaster Recovery Services Business Impact Analysis helps you take the next steps in achieving a robust Disaster Recovery protection program.

Dell consultants work collaboratively with you to determine potential solution or technology areas that can yield measurable results with predictable outcomes, pricing, and timelines. We can help you make more informed and confident decisions on where to focus your IT resources. This workshop is indicated if you would like to:

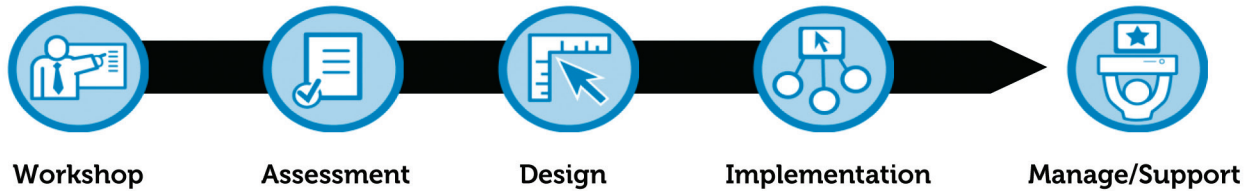

- Explore tools and techniques to evaluate and improve your DR readiness.
- Understand current and future DR requirements.
- Identify new applications, legacy infrastructure, performance degradation, mergers and consolidation.

Realize the Benefits

- **Accelerate time to value.** Dell's DR services will quickly identify your business requirements, and understand how new and existing technologies can help your organization meet these needs.
- **Pinpoint potential time and cost savings.** Areas for improved efficiency are identified and recommendations are made to help you save time and money.
- **Identify next steps.** Dell helps you identify your status in the process and what service level you require. We collaboratively work with you to help meet your business goals within your prescribed budgets.
 - Identify applications, inter-dependencies, financial impact, and criticality of applications or data sets
 - Application Ranking – Determine the most critical applications for your business.
 - Recovery Point Objective – Establish a schedule for post disruption when work, systems, and tools should be restored.
