2350d/dn

Consider what happens when you hit *print*. On the surface, it seems like an insignificant action at a low cost. But, when you consider that every employee in your organization is hitting *print* multiple times a day over the course of a fiscal year, you realize that this one tiny action can represent a significant cost to your organization – a potentially “unmanaged” cost that, when managed proactively, is one of the top 20 ways to cut IT expenses, according to Gartner.¹

You can partner with Dell to reduce your printing costs over time. Dell’s printer and multifunction device lineup is engineered to reduce your total cost of print by providing increased product reliability plus extensive warranty and maintenance coverage.

Reduce costs, increase output, and maximize uptime

When you hit *print*, you can be sure that Dell is helping you control operational costs. Dell reduces your costs to procure and manage printers, offers you reliable products, increases your total printer output, and backs its printers with one of the best standard warranties in the business.

Save up to 30% over HP on your total cost of printing with Dell printers²

Dell engineers its line of professional printers to help organizations of all sizes proactively save up to **30% of their total cost of printing** – a combination of printer acquisition cost, consumables cost, and service cost over a three-year period – compared to HP.

Comparison Table	Dell 5330dn Laser Printer	HP LaserJet 4015dn	Savings
Acquisition Price	\$1,099	\$1,479	26%
Consumables Cost (3 Years)	\$824	\$912	10%
Service Cost	3 Years of Dell Next Business Day On-Site Service after Remote Diagnosis ² \$0	HP 3-Year Next-Business-Day On-Site Service \$349	100%
Total Cost of Printing	\$1,923	\$2,740	30%

With savings like these, you can invest more into IT

For instance, if your organization purchased 100 Dell 5330dn laser printers (instead of 100 units of the comparable HP Laserjet 4015dn), you could save up to \$81,000 over three years — enough to purchase **84 Dell Latitude E6410 notebooks** (\$960 ea).³

Get up to 11% more printer output capacity per month over HP

Dell engineers its workgroup and enterprise network printers to handle up to 11% more output per month, as measured in maximum monthly duty cycle, than comparable HP printers.⁴ That means you get more printouts per month from your frequently-used printers compared to HP. Users can print more and you can network more users to a single printer to get the most out of Dell's extra print output capacity.

Not only can you get more from your Dell printers, you can also feel confident that Dell printers are reliable. In fact, several Dell printers have been recognized for their outstanding quality and reliability by Buyer's Laboratory Inc.⁵, and several models have also been awarded "best in class" in the 2009 and 2010 *Better Buys for Business Editor's Choice Awards*.

Dell's here to help maximize your printer uptime and minimize maintenance

- **Dell covers ongoing maintenance & parts with our standard warranty**
Dell is so confident in the reliability of its printers that we cover the ongoing maintenance during the warranty period — a benefit few other vendors offer today. That means that you won't have unexpected maintenance costs since all components are covered. For example: if the fuser kit breaks (up to a \$300 cost), Dell will replace it at no charge under our standard warranty.
- **Dell printers and supplies are available in more places**
Dell now offers printers and toner through distributors, resellers, and retailers so you can get supplies when and where you need them.

Let Dell help you manage your printing costs proactively with:

- Lower initial printer procurement costs
- Lower operational costs over time
- Award-winning, reliable products
- Improved printer output capacity, and
- One of the best standard warranties in the business

Key Dell printers have received honors for reliability, high quality, exceptional performance and real value⁵

Environmentally efficient

Several of Dell's latest LED printers use EA-Eco toner, including the 1250c, 1350cnw, 1355cn and 1355cnw. And in 2009, Dell introduced the 5130cdn, Dell's first laser printer with EA-Eco toner. The Dell 5130cdn is one of the fastest A4 color laser printer in the world and can consume up to 32% less power with the new EA-Eco Toner during printing compared to the HP CLJ4700n/dn while still producing rich, glossy printouts. Furthermore, it comes with a standard duplexer that can achieve 80% duplex speed efficiency. The result: you can reduce energy consumption and paper usage without sacrificing print quality, speed, and workflow.

1. Neal Weinberg, *Network World*, October 15, 2008 05:03 PM EST; <http://www.networkworld.com/news/2008/101508-gartner.html>

2. HP P4015dn is \$1479 — www.hp.com as of 10/8/10; Dell 5330dn is \$1099 — www.dell.com as of 10/8/10

3. Starting price on the Dell E6410 at \$960 — www.dell.com as of 10/8/10

4. Based on maximum duty cycle comparisons and pricing on new Dell line vs. comparable HP product, using Dell workgroup (5000 series) and enterprise workgroup (7000 series) laser printers and comparable HP laser printers. Maximum monthly duty cycle is the recommended maximum total number of pages per month the printer can print. Dell does not guarantee performance if printer exceeds maximum duty cycle in specified time period.

5. BLI awarded the Dell 5130cdn color laser printer "Pick of the Year - 2010" for "Outstanding Legal-Size Departmental Color Printer" and the Dell 3333dn and Dell 3335dn multifunction laser printers "Pick of the Year - 2010" for "Outstanding Small Workgroup Monochrome Multifunction Printer." Better Buys for Business awarded several Dell laser printers its Editors Choice Award for 2009 and 2010 for their market-leading speed, value, and power.

1-Year NBD On-site Service after Remote Diagnosis⁷

1-year NBD Advanced Exchange Service⁸

Protect your image with service and support

You and your work will look good over the long term with a variety of optional Dell service packages tailored to varying customer requirements. Dell ProSupport¹² offers an advanced level of technical support expertise at a dedicated 24x7, toll-free number with a variety of response-time options. Enjoy the convenience of Dell ProSupport On-Site Repair Service After Remote Diagnosis,⁷ which is offered with select printers. For issues covered by your Limited Hardware Warranty,⁶ a technician and/or part will be dispatched, if necessary, usually within 1 or 2 business days following completion of Remote Diagnosis.⁷

Next business day advanced exchange service⁸ (select printers)

If you have a problem with your printer during your limited hardware warranty⁶ period that can't be fixed with phone-based support and troubleshooting, we will ship you a replacement unit the next business day.⁸ All you do is set up your new printer and ship back the defective unit, prepaid by Dell.

Maintenance kit coverage

Fuser maintenance kit replacement is included in the base and extended limited hardware warranties⁶ for most Dell Laser Printers based on usage and service level.
