

SAP® MII (Manufacturing Integration and Intelligence)

A flexible shop-floor solution for manufacturers

Harness and control production planning, plant maintenance, inventory management and quality assurance

Dell™ Services can create flexible shop-floor solutions for manufacturers to improve the speed of access and visibility of their production environment while forging additional links between production shop-floor activity and the remainder of their enterprise business processes and systems.

The SAP® MII Solution with Dell Services:

- Provides a flexible shop floor solution, aka "light" MES
- Includes a wide variety of templates for key shop floor transactions and KPI reporting
- Enables predictable implementation time — usually 90 to 120 days
- Choose flexible project models — Traditional vs. AGILE
- Provides true partnership opportunities ranging from knowledge transfer to joint development
- Supports Six Sigma, Lean manufacturing and right first-time manufacturing

Create a flexible shop-floor solution based on your company's business objectives in any industry

Let your company experience a flexible shop-floor solution focused on providing a standardized platform to solve practical shop-floor problems around data visibility, operator interface or KPI reporting. SAP MII allows your company to gain shop-floor visibility through access to accurate, real-time information vital to management and continuous improvement of manufacturing facilities.

The Dell SAP team combines proven manufacturing expertise with the SAP Manufacturing Integration and Intelligence technology to help manufacturers integrate information from production floor devices, operators, supply partners, third-party operation and distribution providers and customers, thereby enabling continuous improvement programs such as Lean Manufacturing and Six Sigma initiatives.

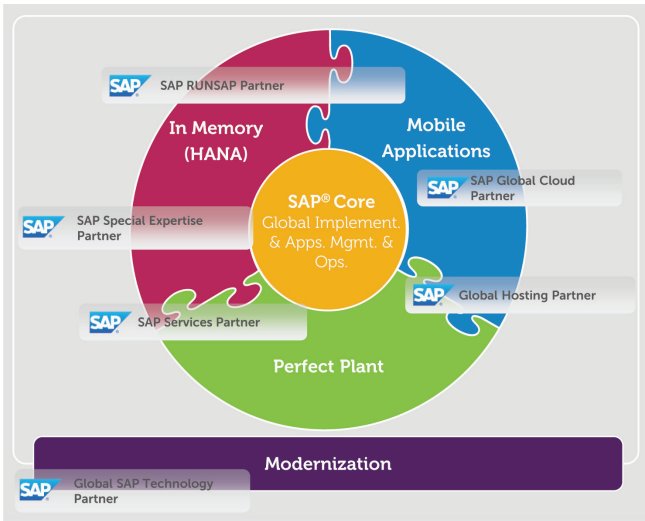

SAP MII is a cross-industry solution focused on providing practical answers to shop-floor integration and visibility concerns. Whether you are a high tech company facing data integration issues from your current MES to your ERP or a heavy construction manufacturer looking for a common operator interface, SAP MII provide a custom solution for your current business requirements.

With practical industry experiences ranging from mill products (metals, paper, building products, textiles), chemical producers, industrial machinery and components, aerospace and defense, automotive, medical devices, food and beverage, high tech and consumer packaged goods, the Dell team can customize the SAP MII tool into a valuable asset for any organization.

SAP MII (Manufacturing Integration and Intelligence)

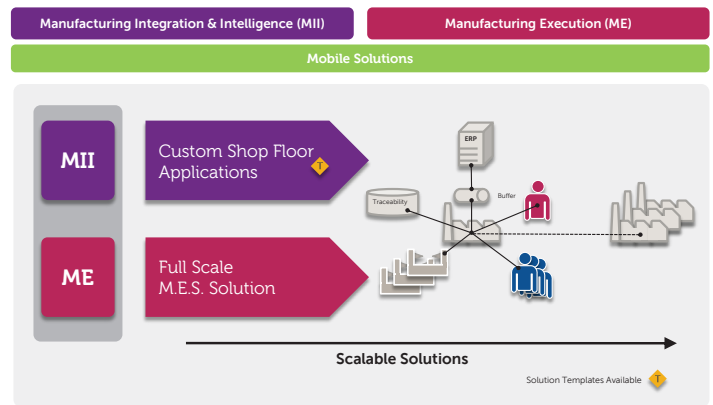

Dell Services can help you design, implement and manage your enterprise-wide SAP implementation. Our experience as a leading technology and systems integrator means you get the results you need at an predictable price.

Dell Services - Core Competencies SAP and System Integration

Dell's Mission for Perfect Plant Services

Provide customers a comprehensive and scalable shop floor solution by leveraging industry experience with:

Trust Dell Services – a global SAP partner

To help manufacturers enhance the value of their SAP and MII investments, Dell Services has built methodologies and processes based on our experience with successful design, development and management of manufacturing plant solutions and ERP solutions. With this expertise, we have established a proven approach that makes implementations predictable for our customers while providing the high degree of customization that many businesses require.

The Services MII solution with Dell Services offers several key advantages:

- Provides a flexible shop floor solution, aka "light" MES
- Provides a flexible shop-floor solution, such as "light" MES to specific reporting or interface requirements
- Includes a wide variety of templates for key shop-floor transactions and KPI reporting, ranging from operator dashboards to overall equipment effectiveness (OEE)
- Enables predictable implementation time – usually 90 to 120 days
- Choose flexible project models – Traditional vs. AGILE
- Provides true partnership opportunities ranging from knowledge transfer to joint development
- Supports Six Sigma, lean manufacturing, and right first-time manufacturing

To help deliver the results you expect, Dell Services has a fully staffed and experienced SAP team that includes seasoned process consultants, architects and technologists. Working in close collaboration with SAP and combined with our proven onshore and offshore applications teams, Dell Services has a full range of capabilities to help your business achieve success.
