

Dell Global Environmental Policy

Rev. January 2010

Dell aspires to be a company in which environmental excellence is a priority in all things we do. Our goal is to fully integrate environmental stewardship into the business of providing quality products, best-in-class services, and the best customer experience at the best value.

The following criteria provide a framework for establishing and reviewing our environmental objectives and targets:

- *Deliver Environmentally Responsible Products and Services*
 - *Design products considering their lifecycle environmental impacts.*
 - *Provide products and services that provide environmental benefits to our customers.*
- *Prevent Waste and Pollution*
 - *Operate Dell's facilities to conserve resources, minimize harmful impacts on the environment, and prevent pollution.*
 - *Set expectations of environmental excellence in our supply chain and among our business partners.*
- *Demonstrate Environmental Responsibility*
 - *Use sustainable practices that protect Dell's employees, neighbors, and the environment.*
 - *Communicate and discuss company progress openly.*
- *Comply With the Law*
 - *Conduct business in full compliance with applicable environmental laws and regulations.*
 - *Meet the commitments of the voluntary environmental programs in which Dell participates.*
- *Continually Improve*
 - *Foster a culture of environmental responsibility and employee engagement.*
 - *Evaluate and continually improve our environmental performance.*
