

Federal Government Services

Enhancing government operations during challenging times

There is an air of change moving through our nation's capital. Federal agencies face global and technological challenges as never before, and have been tasked with rebuilding our national economy, while at the same time, having to accomplish more with less. The new Administration is committed to using information technology as an enabler to transform government services to be more responsive, transparent, and accountable.

In this rapidly changing environment where every operational decision matters and scrutiny is higher than ever, agency leaders need service providers they can trust. They need a financially stable provider that is agile and responsive, yet has the experience and capabilities needed to successfully drive innovation and produce reliable, measurable results.

A proven, trusted service provider

Founded more than 20 years ago, Dell Services Federal Government has helped thousands of companies and organizations—including more than 30 federal agencies—use information technology and business process solutions to improve performance and reduce costs.

We're modest in our approach, but proud of the innovation and thought leadership we deliver to our customers every day. We've earned a reputation for excellence based on strong values and principles. With a talented team of global professionals, we are big enough to handle any sized challenge or opportunity that comes our way, yet agile enough that every account and mission matters.

Our foundation for success is simple:

We adjust to the customer's mission with flexible, innovative, and cost-efficient services.

- We invest in our customer's success through performance-based contracting, and a tradition of service that is built on a deep commitment to operational excellence.
- We want every American to get the best value they can for every dollar the government spends. Let us show you how we will invest in your success.
