

Windows®. Life without Walls™. Dell recommends Windows 7.

Latitude™ E

Protect yourself from nasty spills.

The new Dell Latitude E-Family of laptops has been totally redesigned with over 100 improvements, including enhanced spill resistance.

Working out of the office can be tough on your equipment. That's why the new Latitude E-Family of laptops all come armored with rounded magnesium alloy edges, reinforced solid-metal-plated hinges and a hard-wearing, tri-metal casing. They also feature the latest Intel® Core™ i processors for faster processing and life-like graphics. To protect against water and the occasional large latte, there's a spill-resistant keyboard and a fast-response Free Fall Sensor to help protect your data if the machine is dropped. It's not surprising these laptops are also military-grade tested. So don't risk it. Protect your company's data with one of the new Dell™ Latitude E-Family laptops.

OptiPlex™

Our latest additions to the family.

With the most chassis and AIO options, our new OptiPlex family of desktops can fit virtually any user need.

Introducing the new family of OptiPlex desktops, now with the most chassis and AIO options. To increase end users' productivity, each machine supports up to four monitors and offers the latest Intel® Core™ i processors for faster processing, stunning graphics and increased energy efficiency. And since each desktop is part of the OptiPlex family, everything from managing parts inventory to routine maintenance is easier – saving you time, money and resources.
