

Trend Micro™

Worry-Free™ Business Security Services

Enjoy true peace of mind

Last year, cybercriminals stole millions of dollars from small and mid-size business bank accounts.* Your business needs security that can protect your computers and the information on them whether your employees are connecting in the office, at home, or on the road. But if security is not your area of expertise, why make it tough on yourself? You need a solution that's designed specifically for your size of business: one that's a snap to install, effortless to configure, and can give you worry-free protection. That's what we call Trend Micro™ Worry-Free™ Business Security Services—you get peace of mind so you can focus on what you do best—taking care of your clients.

Choose security designed for small and mid-sized businesses

Worry-Free Business Security Services is designed to provide customers with protection for Dell and other computers that are in the office, at home or on the road. It's security delivered as a service that's designed to be always connected so your business is always protected.

It's offered pre-installed on your Dell computer and it's simple to manage. When you subscribe to Worry-Free Business Security Services, you don't have to worry about viruses or threats to your business. Trend Micro automatically manages security updates for you, whether you have a server or not. Plus, the easy-to-use web-based console let's you secure and monitor your computers from just about anywhere, so you can feel confident your information is safe.

Worry-Free Business Security Services is powered by the Trend Micro™ Smart Protection Network™ infrastructure. Like a global neighborhood watch, its sensors discover the latest threats wherever they emerge to ensure your business is always protected.

Experience security from the leader in protection**

Trying to protect multiple computers with a mix of security products? If your security isn't continuously updated, you may be vulnerable to infections that can disable your machines or to hackers who can steal from your business. Are you thinking of installing an on-premise security server? If so, do you have the time and resources it takes to configure and maintain your own server, track policy updates, and stay current on the latest web threats? There's a simpler choice for security: choose #1 rated Trend Micro Worry-Free Business Security Services**.

BENEFITS FOR SMALL AND MID-SIZE BUSINESSES	
Offered pre-installed on Dell Vostro, Opti-Plex, Precision and Latitude computers	Just activate, login, connect to protect—and you're secured. Register online and receive instant access to the service. Then, simply connect each machine.
Protects your critical business data and files from theft or tampering	You can safeguard your data, including Quickbooks financial data, with lock-down protection for any folder.
Protects you from threats coming from USB devices or Wi-Fi connections	Your workforce is protected from viruses carried on USB devices, and from hackers that attack when your computers log on to wireless networks.
Fast processes won't slow your computers down	Processing occurs in our datacenters so antivirus defense won't slow down your PCs and servers.
Allows you or your trusted IT partner to easily manage and monitor security	Centrally manage your desktops and laptops from anywhere. Get quick overviews and alerts to identify high-risk areas and schedule reports.
Constantly updated for the latest threat prevention	The Smart Protect Network, a firewall, and advanced behavior-based protection ensure your computers are always protected.
Provides global neighborhood watch via Trend Micro Smart Protection Network	More than 50 million threat sensors around the world identify new threats constantly to block dangerous websites and files.
