102-30 Effectiveness of risk management processes	<p>As founding members of the Responsible Business Alliance (RBA), we have fully adopted the RBA Code of Conduct for our own operations, and we expect our suppliers to abide by the Code and to expect the same of their suppliers. As part of this process and through the years we have implemented robust management systems—embedded in our operations—to identify, manage and mitigate risks in these areas (environmental, social and governance). In addition, our own facilities are subject to audits through RBA’s validated audit process. This audit process is one of the mechanisms we use to assess the effectiveness of our risk management processes for social, environmental and governance issues. During FY18, six of our facilities underwent RBAs audits. There were no priority findings. Two of these facilities had two major nonconformances each. Corrective action plans have been developed and are being implemented. We expect to have closure audits, as appropriate, during FY19.</p>
