

Dell + Windows 8

Touch the future.

The Lineup

Experience inspired design, fluid movement, and an intuitive, enjoyable user experience to work, learn, create and play with the latest products from Dell.

Share your success.

XPS 10

10.1" HD touchscreen display with split screen capability is ideal for multitasking.

Optional high-performance keyboard dock with gesture trackpad and ports – delivers true work/life productivity in a tablet.

Powered by Windows RT, and preloaded with Microsoft® Office Home & Student 2013 to tackle work and homework.

Power suit.

XPS 12

Innovative, flip hinge design for seamless transition from laptop to tablet mode.

Crafted from premium materials with purposeful features and stunning aesthetics.

Full HD screen for exceptionally clear and bright video viewing.

Super model.

XPS 13

Stunning design in a razor thin (6-18mm) and light (2.99lbs) package.

Enjoy more content with a 13" display cleverly fit into a nearly 11" laptop.

Boots in seconds with all-flash design and Intel Rapid Start Technology.

Designed to go the distance.

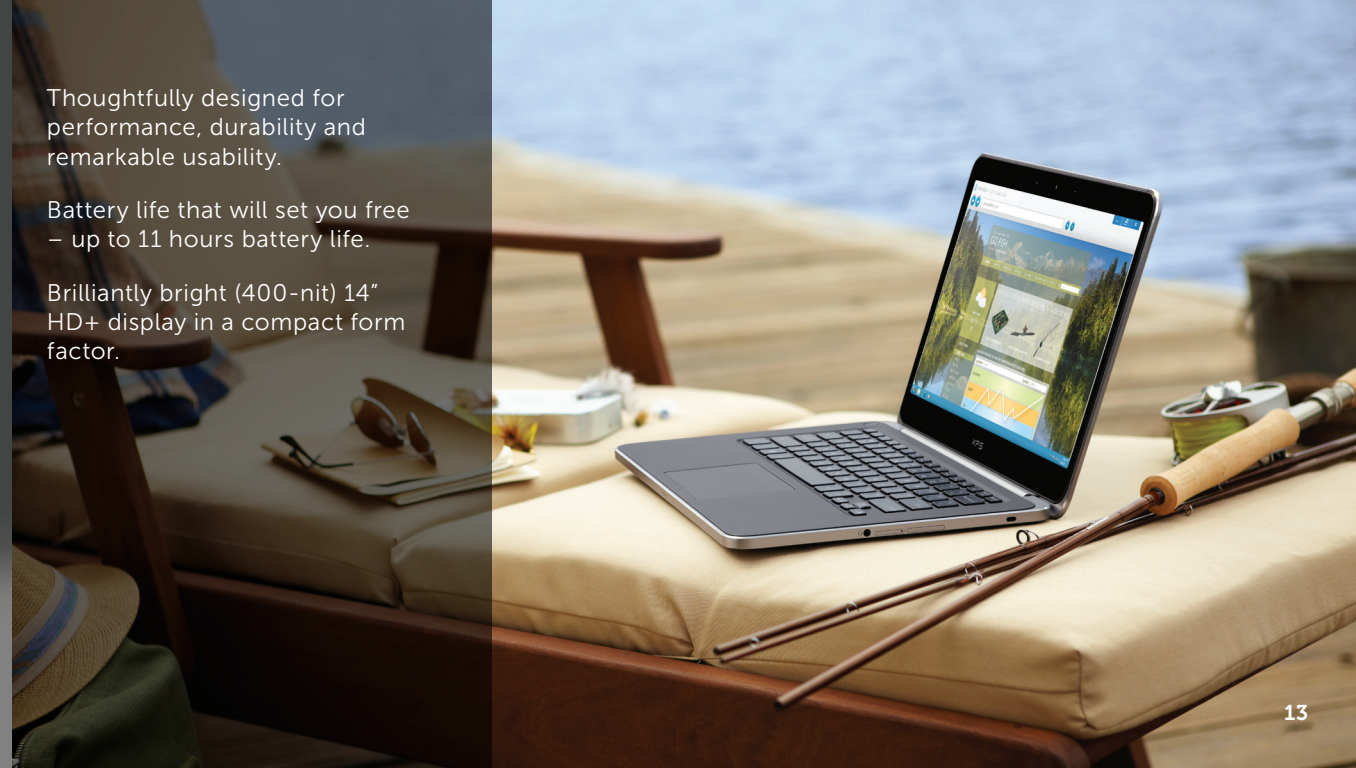

XPS 14

Thoughtfully designed for performance, durability and remarkable usability.

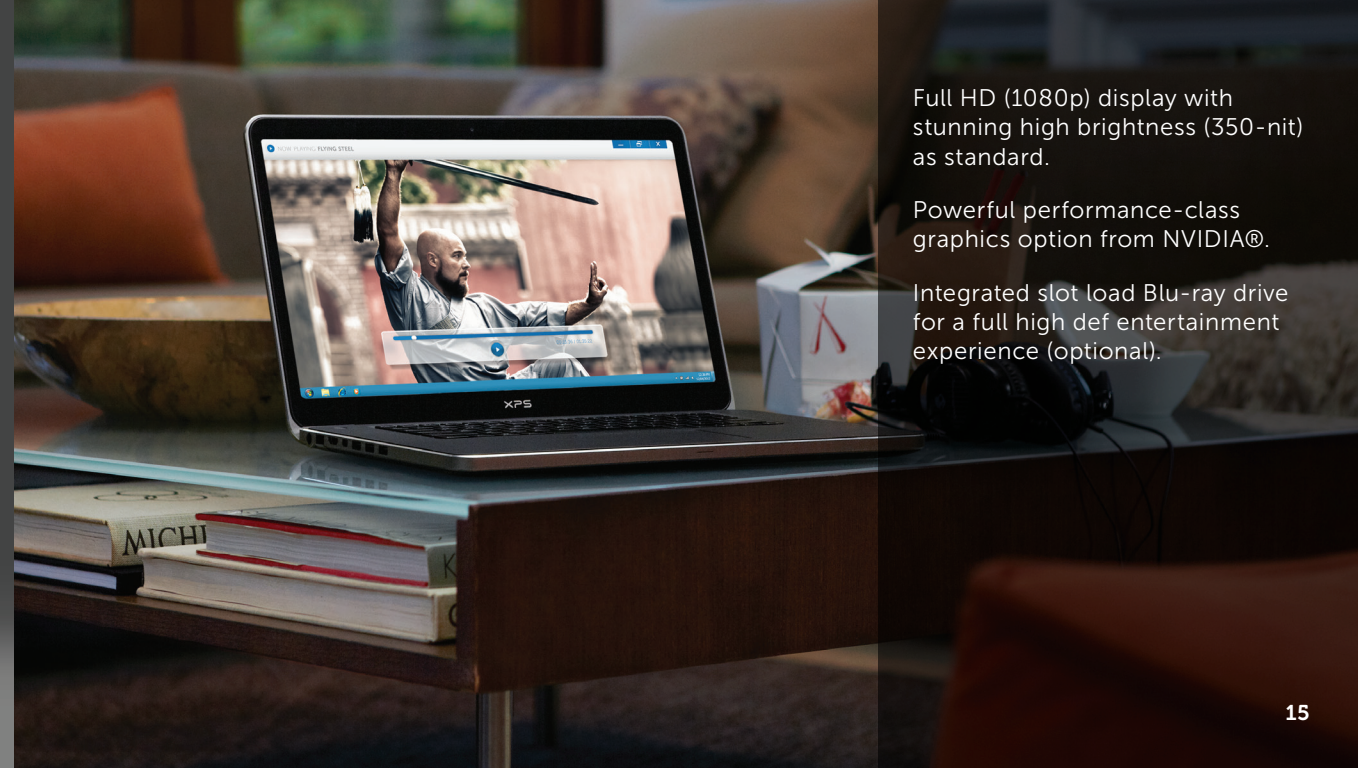

Battery life that will set you free – up to 11 hours battery life.

Brilliantly bright (400-nit) 14" HD+ display in a compact form factor.

Work wonders.

XPS 15

Full HD (1080p) display with stunning high brightness (350-nit) as standard.

Powerful performance-class graphics option from NVIDIA®.

Integrated slot load Blu-ray drive for a full high def entertainment experience (optional).

One-of-a-kind.

XPS One 27

Less is more with beautifully spare yet powerful all-in-one design.

Amazing 27" Quad HD touch display boasts vibrant images and fluid interaction.

New articulating stand for comfortable and intuitive use with touch or to improve viewing angles.

Leap tall tasks.

Inspiron 15z

Touch-screen option is fun & intuitive: tap, scroll, slide and zoom directly on the screen.

Built-in optical drive keeps you entertained on the go / allows you to bring your movies with you.

Standard backlit keyboard is great for working in low-light spaces.

One-piece of mind.

Inspiron One 23

Simple, space-saving design.

Crisp Full HD 23" Touchscreen for best Windows 8 experience.

Keep in touch with HD Webcam w/Dual Digital Array microphone.

Wireless keyboard and mouse complete clutter-free design.

Headquarter your business here.

Latitude 10

10-inch touch-enabled tablet which allows businesses to bring tablets into their enterprises.

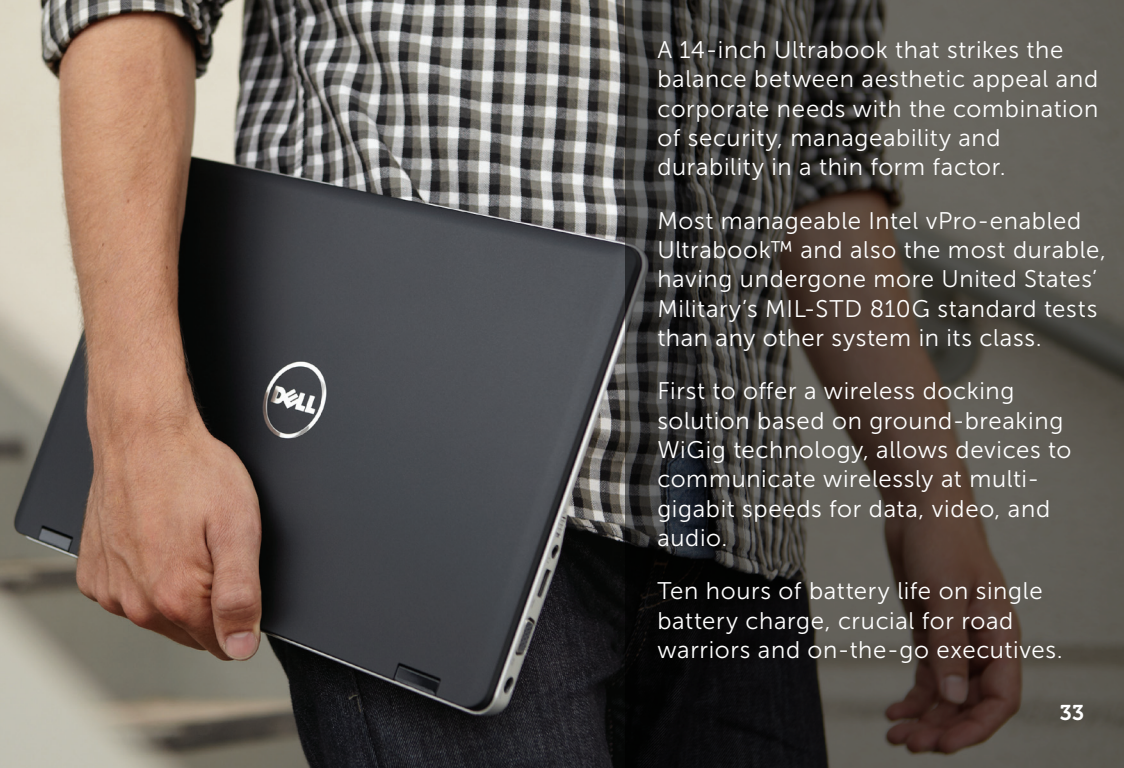

Plugs easily into existing management consoles, supports legacy productivity applications and features a swappable battery.

Offers up to eighteen hours of battery life and an optional productivity dock and active stylus.

Design made durable.

Latitude 6430u

A 14-inch Ultrabook that strikes the balance between aesthetic appeal and corporate needs with the combination of security, manageability and durability in a thin form factor.

Most manageable Intel vPro-enabled Ultrabook™ and also the most durable, having undergone more United States' Military's MIL-STD 810G standard tests than any other system in its class.

First to offer a wireless docking solution based on ground-breaking WiGig technology, allows devices to communicate wirelessly at multi-gigabit speeds for data, video, and audio.

Ten hours of battery life on single battery charge, crucial for road warriors and on-the-go executives.

Where strength meets style.

OptiPlex 9010

The ultimate in performance, dependability and smart design precisely tuned demanding and specific user needs.

Provide a desktop-like workstation experience in a durable, easy to use mobile platform to enable designers, engineers and other professionals to create anytime, anywhere.

Run complicated, high-demand professional applications smoothly with up to 4GB of dedicated video memory and up to 1344 CUDA cores.

Power & mobility? Precisely.

Precision M6700

Dell's first Windows 8-certified touch display, supports up to 10 touch points.

Great flexibility and comfort with multi-position, 90-degree articulating stand.

Gorgeous 23" Full HD LED display with in-plane switching and wide-angle viewing.

Multiply the fun with multi-touch.

Dell TP713 wireless trackpad

Experience fluid gesture and multi-touch capability on any Windows 8 PC.

Swipe and scroll with ease with large, smooth and durable touch surface.

No wires means place where it's comfortable and keep the desktop clutter-free.

Go Green
with Dell.

Powering the Possible

At Dell, we're committed to excellence, end-to-end. We put technology and expertise to work in ways that are good for people and for the planet we share.

Design: With Dell, you can make an environmentally responsible, energy efficient choice. Most of our consumer products are EPEAT registered and ENERGY STAR qualified.

Ship: We pack with renewable, local and biodegradable bamboo. This giant grass grows near our manufacturing sites — at a rate of up to 24" per day! — and is easy to recycle or compost.

Recycle: We partner to make technology recycling simple. Just take your equipment — any brand in any condition — to one of Goodwill's over 2,600 participating locations in the US or Canada, and we'll responsibly refurbish or recycle it free of cost to you.

Expect more
with Dell.

Dell Tech Concierge

Our industry experts help keep your Windows-based devices up and running, all day, all the time, no matter what brand you use. This subscription-based phone and chat service provides you with a new level of technology support. With the combination of our cloud based software and industry experts we are able to do it for you — so you don't have to: from helping solve urgent issues to ongoing maintenance, virus protection and optimization. This service is designed to protect you from the frustrations of technology downtime 24/7. Whether you need help with your home network, computer entertainment system, printing, uploading photos or customizing your connected devices, we are here to help.

Why is Dell Tech Concierge different?

- 24/7 access to industry experts to ask any question any time: Training, customization, tips and tricks
- Proactive maintenance, protection and deep clean
- Troubleshooting for your computer and connected devices
- Full suite of internet security to guard against virus attacks
- Software and hardware troubleshooting
- And more...
