

Ergotron®

Tablet Management

Up to **43%**
smaller
and
lighter
than competitive
offerings

Highlights

- Open-architecture cart for fleet management of tablet devices allows for a flexible response to future technology changes. Universal design accommodates most tablets. See website for complete listing
- Transport, secure and protect up to 24 tablets. Charge and sync tablets using USB 1.2 charging, Apple divider charging, and USB 2.0 syncing
- Charge all tablets simultaneously with one power cord to the wall socket
- System automatically switches from charging to syncing when a Macbook or PC is connected. Charging status is visible using the optional Individual Status Indicator (ISI) LED feature
- Single modules are available and can be used as a desktop unit
- Up to 43% smaller by volume and 43% lighter than competitive offerings

Sync and charge. Lightweight, compact, easy to maneuver, secure and cost-effective design

Works in any environment including education, healthcare and enterprise applications.

- ① Easy one-time setup: clean, neat cable management drawer. Secure drawer is separate from tablet compartment, limiting student access.
- ② Syncs and charges up to 48 tablets
- ③ Auxiliary electrical outlet: position Macbook or PC on top of cart and plug in for syncing capability. Included in North American and Japanese carts and in required Power Kit for APAC and EMEA
- ④ 12' (3.7 m) power cord with external cord wrap. Included in North American and Japanese carts and in required Power Kit for APAC and EMEA
- ⑤ LED power status indicators on each module show on/off and fault status. In addition, Individual Status Indicators (ISI) are available on some models.
- ⑥ Provides secure access and storage
- ⑦ Compact open-architecture design accommodates most tablets. See website for complete listing
- ⑧ Easy to maneuver: four 4" (100 mm) premium double-wheeled casters, two (2) locking

Ships fully assembled

Easy one-time setup
