Cloud Connect

V3 (UK) published a positive review of the Dell Wyse Cloud Connect virtualization key. It is an interesting device that is likely to find a home in sectors such as education, where a low-cost end point will have appeal. It can also be used as an Android-based PC in its own right."With Cloud Connect, Dell Wyse has created one of the lowest-cost thin client terminals available for virtual desktop or Citrix environments, which is likely to appeal to customers in the education market, for example."

OptiPlex 3020 Micro

ITProPortal (UK) has published a positive review of the OptiPlex 3030 Micro, describing it as an affordable computer for businesses who simply require decent software and internet for their daily tasks. It praised the compact size of the OptiPlex and the flexible mounting options. "The Dell Optiplex 3020 Micro is almost a notebook without a screen, but if you want a tiny no-nonsense system that will be almost invisible on a desk, or even fitted underneath, there is plenty to commend it."

IT Pro Portal - UK

27/10/2014

Computeractive Buy It' stamp of approval 5 out of 5 stars

Optiplex 9020

Computeractive (UK) has published an excellent review of the OptiPlex 9020, positioning the device as a 'fast Windows 7 all-in-one PC'. The review compliments the compact design, screen resolution and powerful processor of the PC, receiving five out of five stars and also awarded the 'Computeractive buy it' stamp of approval. "It's one of the best AIOs we've seen and is great value, especially with its generous warranty."

Cad Place (UK) published a positive article looking at how

well the AMD FirePro GPU runs on the Precision T1700 SFF. The Precision T1700 SFF is described as being a compact, dual-processor professional workstation."We're talking about the ultra-high-end combination of the Dell Precision T7610 and the AMD FirePro W9100. Both products provided the maximum performance from their respective product families. "

Precision T5610

TechRadar Pro (UK) has published a positive review of the Precision T5610, positioning it as a well thought out, expertly designed, sturdy, powerful and reasonably priced workstation. "As far as a desktop kit does, it's pretty awesome. The most delightful aspect is the way the whole thing tilts over on its hefty stand until the chassis is completely horizontal."

Precision T7610

TechRadarPro (UK) has published a good review of the Precision T7610, awarding it four out of five stars overall. The workstation is described as being expertly designed, sturdy and powerful and it is good value for money. It also highlighted the clever design of the casing and layout of the motherboard and cables which enable easy access. "The Dell Precision T7610 is a brilliant piece of hardware packing some great components. It's built like a tank, and it feels like one, but is surprisingly quiet when in use, even under load. There's not much competition around as well especially if you're limiting yourself to tier-one vendors like HP or Lenovo."

4 out of 5 stars

Optiplex 9030

TFG Tech (SAF) published a positive review of the OptiPlex 9030, highlighting its fantastic touchscreen, great speakers and impressive security. "No one does business like Dell. This PC arrives with no mouse or keyboard, which speaks to its true intentions. You don't buy one of these for your home... You buy one for the team of salespeople and admin drones who push along all those papers that make sure your business hums."
