<tr>
<td><strong>Ideal workloads</strong></td>
<td>High performance computing, Digital Manufacturing, Research, Web Tech/Hosting, hyper-converged infrastructure</td>
<td>High performance computing, Web scale applications and SaaS, high performance big data analytics, financial modeling and high frequency trading, hyper-converged infrastructure</td>
<td>Cognitive workloads such as artificial intelligence, machine learning, deep learning and for technical computing in for financial services, life sciences, HPC, etc.</td>
</tr>
<tr>
<td><strong>Form factor</strong></td>
<td>Up to 4 independent hot-swappable 2-socket C6525 server nodes in a 2U C6400 chassis</td>
<td>Up to 4 independent hot-swappable 2-socket C6420 server nodes in a 2U C6400 chassis</td>
<td>Ultra-dense 1U, 2-socket platform</td>

“Comet can run a wide variety of applications and hundreds, if not thousands, of researchers’ jobs at a time, thanks to Dell PowerEdge servers with Intel processors.”

- Rick Wagner, HPC Systems Manager, San Diego Supercomputer Center

Data centers are undergoing a transformation to meet the demands of the digital economy. Built for scale-out workloads like high performance computing, deep learning and data analytics, Dell EMC PowerEdge C series platforms deliver the latest high speed memory, fast NVMe storage and workload-based BIOS tuning. Scale efficiently and predictably with flexible configurations and advanced connectivity options. Take advantage of new factory integrated Direct Contact Liquid Cooling for improved power efficiency.* And with intelligent automation, you can empower your team, freeing them from routine maintenance. Future-proof your data center with the worry-free and flexible PowerEdge C Series portfolio.
When you buy a Dell EMC server, you get more than just hardware. You get access to IT solutions end-to-end. Dell and EMC bring together industry-leading expertise into a common platform to help you transform your data center. Dell EMC can deliver PowerEdge technology at any level of integration – from a best-in-breed platform, to a pre-integrated fully turnkey hybrid cloud implementation or any step in-between. Combining the PowerEdge server infrastructure with Dell Services and Financial Solutions allows you to modernize your data center faster, more affordably and with less risk.

**OpenManage Systems Management**

Spend less time on routine maintenance and stay focused on your business-critical priorities, thanks to the intelligent automation capabilities of PowerEdge servers. OpenManage™ System Management means your servers can take care of themselves, with zero touch configuration, proactive support notification and easy system erase when it is time for systems to be retired or redeployed. With iDRAC's agent-free server management, you can utilize consistent methods to manage servers regardless of the installed OS and workloads. You can remotely manage PowerEdge servers via scripts with the new, Redfish-compliant iDRAC Restful API, Dell and third-party consoles, or legacy APIs.

**Dell EMC Services**

To fully implement a modern infrastructure, organizations require reliable, comprehensive IT services to drive IT transformations, accelerate adoption of new technologies and maximize productivity.

**Architect:** Get started with our IT Transformation Workshop to accelerate your transformation to becoming an agile business partner and broker of services to the business.

**Implement:** The ProDeploy Enterprise Suite helps you get more out of your new technology starting day one. Trust Dell EMC experts to lead deployments from basic hardware installations through planning, configuration and complex integrations.

**Manage:** The ProSupport Enterprise Suite ensures 24x7 access to elite ProSupport engineers along with automated, proactive and predictive tools enabled by SupportAssist. Our personalized service and preventative measures help you get ahead of problems before they happen.

**Dell EMC Data Center Infrastructure**

Dell EMC Data Center Infrastructure (DCI) simplifies and manages critical infrastructure in and around the data center serving the needs of your business. A complete portfolio of racks, power and cooling solutions lets you scale as your data center needs grow.
