Run more applications without expanding your datacenter
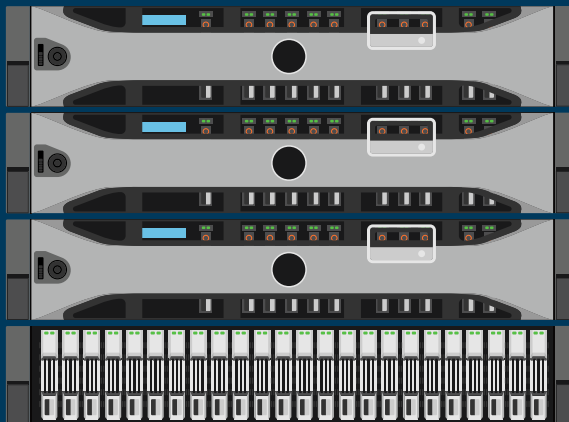

by upgrading to a Dell™ PowerEdge™ R730 and VMware® vSphere® solution
powered by Intel® Xeon® processors E5-2660 v4

Do 18 times the work in the same amount of rack space

18 legacy solutions

New PowerEdge + vSphere solution

3x
Dell PowerEdge
R730 rack server

Dell Storage
SC4020

Gain insight on hardware

DPACK is performance analysis software that can help you characterize your existing performance and resource utilization. Run it in your datacenter to see current limitations, which can guide your upgrade process.

The advantages of Dell OpenManage™ Essentials and VMware vRealize® Operations Manager™

Familiar tools
Manage your new servers with the same tools

Updated software
Take advantage of the latest features and functions

Customizable dashboards
Monitor your unique virtual environments in one place
