

POWEREDGE FC640

Flexibility and performance with best-in-class density.

The PowerEdge FC640 delivers powerful performing processors, large memory capacity and highly scalable I/O capability that meet virtualization, server consolidation, scale-out, private cloud or hybrid cloud needs.

Powerful 2-socket modular architecture server

A flexible, two-socket half-height/width compute sled powered by up to two 28-core, Intel® 2nd generation Xeon® Scalable processors, each FC640 supports up to 2TB of DDR4 memory, making it a perfect candidate for dense virtualization environments, software defined storage, databases, HPC, big data analytics, and private cloud workloads. The FC640 storage options include two 2.5-inch drives, with an option of NVMe PCIe SSDs for high performing direct attached storage requirements. The FX2 chassis supports up to four FC640 servers. SDS environment support now includes VMware vSAN with the HBA330 controller.

Innovative management with intelligent automation

The Dell EMC OpenManage systems management portfolio enables peak efficiency for PowerEdge servers, through intelligent, automated management of routine IT tasks. Combined with the unique agent-free management capabilities of the embedded iDRAC9, the FC640 is simply managed, freeing up your time for high profile projects.

- Increase IT data protection and integrity with the embedded security features of iDRAC9.
- Enable collective or individual management of your servers with the Dell EMC Chassis Management Controller (CMC), embedded within the FX2 enclosure.
- Improve IT productivity and agility with OpenManage Enterprise: from bare-metal deployment to ongoing maintenance, and enforcement of IT policies within production environments.

End-to-end server ecosystem and life cycle security

Every PowerEdge server is designed as part of a cyber resilient architecture, integrating security into the full server life cycle. The FC640 leverages new security features built-into every new PowerEdge server strengthening protection so you can reliably and securely deliver accurate data to your customers no matter where they are. By considering each aspect of system security, from design to retirement, Dell EMC ensures trust and delivers a worry-free, secure infrastructure without compromise.

- Rely on a secure component supply chain to ensure protection from factory to the data center.
- Maintain data safety with cryptographically signed firmware packages and Secure Boot.
- Protect your server from malicious malware with iDRAC9 Server Lockdown mode (requires Enterprise or Datacenter license).
- Wipe all data from storage media including hard drives, SSDs and system memory quickly and securely with System Erase.

PowerEdge FC640

- Powered by Intel® 2nd gen. Xeon® Processors Scalable Family
- Perfect for dense 'anything-as-a-service' (XaaS) and on-prem environments
- Access to eight PCIe 3.0 slots via FX2S chassis

PowerEdge FC640

Features	Technical Specification	
Processor	Up to two Intel® 2 nd generation Xeon® Scalable processors, up to 28 cores per processor	
Memory	16 DDR4 DIMM slots, supports RDIMM / LRDIMM / AEP, up to 2933MT/s speeds, 2TB max mem ECC Registered DDR4	
Storage controllers	Internal controllers: Software RAID S140, PERC H330, H730P, HBA330 Boot Optimized Storage system, Internal Dual SD Module	
Drive bays	Front: Up to 2 x 2.5" SAS/SATA (HDD/SDD), NVMe SSD on a Universal Backplane, max 12.8TB (PCIe SSD)	
Power supplies	PowerEdge FX2 enclosure: Platinum Rated - 1600W, 2000W, 2400W	
Fans	Hot plug fans with full redundancy	
Dimensions	40.3mm x 211 mm x 535.8 mm	
Embedded/At-Server	iDRAC9 iDRAC Direct	Chassis Management Controller (CMC)
Consoles & Mobile	OpenManage Enterprise	OpenManage Mobile OpenManage Power Center
Integrations	Microsoft® System Center, VMware® vCenter™, BMC Software (available from BMC)	
Connections	Nagios Core and Nagios XI, MicroFocus	
Tools	Dell EMC Repository Manager Dell EMC Update Package Dell EMC System Update Dell EMC Server Update Utility	iDRAC Service Module iDRAC REST API with Redfish OpenManage Server Administrator OpenManage Storage Services
Security	TPM 1.2/2.0 optional Cryptographically signed firmware Silicon Root of Trust	Secure Boot System Lockdown (requires iDRAC Enterprise and Datacenter) System Erase
I/O & Ports	Network daughter card options 2 x 10GE + 2 x 1GE, 4 x 10GE Video card: VGA controller integrated with iDRAC PCIe: See enclosure specifications	
Supported operating systems	Canonical® Ubuntu® Server LTS Citrix® XenServer® Microsoft Windows Server® with Hyper-V Oracle® Linux	Red Hat® Enterprise Linux SUSE® Linux Enterprise Server VMware vSphere® For specifications and interoperability details, see Dell.com/OSsupport .
