

ADOBE® ACROBAT® CONNECT™ FAMILY COMMUNICATE AND COLLABORATE INSTANTLY THROUGH INTERACTIVE, REAL-TIME WEB CONFERENCING

Use Adobe Acrobat Connect products to:

- Provide rich, flexible, and hassle-free web conferencing for business professionals
- Help reduce expenses and accelerate productivity through ad hoc discussions and instant online collaborations
- Communicate and collaborate more effectively with geographically dispersed colleagues and customers in small and extended teams

With the Adobe Acrobat Connect family of products, you can bring real-world functionality to online meetings that can be accessed virtually anytime, anywhere through easy-to-use, more secure, always-on personal meeting rooms.

Instantly communicate and collaborate with anyone

Acrobat Connect online personal meetings are delivered by ubiquitous Adobe Flash® Player, already installed on more than 97% of Internet-connected desktops worldwide. So your audience can access them instantly, without cumbersome software downloads or setup. And, your personal meeting room URL is customizable, so it's easy for you and your contacts to remember. You can make it an indispensable part of your e-mail signatures and business cards, just like your phone number and e-mail address.

Help reduce expenses and boost productivity

Online personal meetings with audio conferencing and video help reduce travel and accelerate productivity. Participants can collaborate in an informal, highly interactive manner with shared screens, images, documents, integrated telephony, and multiperson video. The simple, intuitive Acrobat Connect user interface also includes whiteboarding, a convenient notepad window for capturing meeting notes, and a chat window that enables participants to share thoughts without interrupting the meeting.

Engage colleagues and customers with rich content

Don't just talk to your audience—engage them with interactive multimedia experiences. Acrobat Connect Professional supports the presentation of rich media content, including video, animations, and software simulations, in addition to the ability to record meetings for later on-demand viewing.

Quickly set up and customize meeting rooms

Focus on your agenda, not your computer. Acrobat Connect Professional provides an intuitive, tab-based interface to help you quickly set up and organize your workflow and content. It also makes it a snap to apply company logos and colors to login screens and meeting room layouts. In addition, the application automatically saves meeting room layouts and contents to a searchable content library, so you can readily launch follow-up meetings. For recurring meetings, you can further minimize setup time by saving custom meeting rooms, complete with content, as templates.

System requirements

Host and participant

Windows®

- Microsoft® Windows XP Professional or Home Edition
- Microsoft Internet Explorer 6.0 or 7.0
- Netscape 8.1
- Mozilla Firefox 1.5.04

Macintosh

- Mac OS X v.10.4
- Safari 2.0
- Mozilla Firefox 1.5.03
