

Dell Mobility Solution Sets

Dell Mobility Solution Sets support the progression of your mobility/BYOD transformation.

The **Mobile Enablement Solution Set** gives you the business-ready devices and solutions you need to ensure your workforce has the secure mobile access it needs to be productive. This solution set also provides a secure, managed workspace on all your devices.

The **Infrastructure and Security Solution Set** helps you optimize your IT environment. It provides capacity, coverage, and contextual access—including user identity and location, device type, time of access and the type of app being accessed.

The **Application Modernization and Development Solution Set** helps you deliver the productivity and collaboration tools your users need on the devices they use.

To pull it all together, we have services designed to help ensure you get the results you're looking for. Whether you need a mobility/BYOD assessment to determine your mobility readiness and future state vision or help with engineering and deployment, we've got the resources and the expertise you need. We also have world-class support and the ability to handle any IT outsourcing needs to help you reduce costs and maximize uptime.
