

The Dell MMH11 Multi-Monitor Hub

Complete high-definition, multi-monitor viewing capability from a single DisplayPort source

Get simple, cost-effective multi-monitor connectivity between a single DisplayPort source and up to three DVI-compatible monitors with the Dell MMH11 Multi-Monitor Hub.

Its plug-and-play features allow you to enjoy multiple-monitor viewing from a single digital output port for each application, such as gaming, graphics design or spreadsheet analysis, without an additional graphics card.

You can also choose to dedicate each monitor to a separate application. No system software or Windows Hardware Quality Lab (WHQL) testing/qualification is required.

The Dell Multi-Monitor Hub is compatible with any PC or notebook that supports DisplayPort output, and any DVI monitor. It has passed all major safety standard certifications including UL, FCC and CE.

Simple,
cost-effective
multi-monitor
connectivity

Key features & benefits

- Easy to use, plug-and-play
- No change required on source device (GPU/display driver)
- Easily works with a DisplayPort-enabled Microsoft Windows desktop or notebook.
- Easily works with all DVI monitors
- Works with full HD-compatible monitors; supports extended resolutions up to 3840 x 1024*
- High performance with near-zero latency video lag
- Support up to 3 monitors
- No external power adapter required; self-powered via USB and DisplayPort

*Product will support up to the maximum resolution of 4096 or less depending on the preferred resolution support (limited by EDID) and DisplayPort bandwidth.
