Client Peripherals

The complete IT package for maximum productivity

Help your employees achieve their full potential with the right tools for the job.

Our products are thoughtfully designed with the style, innovation, functionality, and unique features needed to maximise user productivity. Whether they're field-based engineers working on-the-go, or office-based creatives and designers, we have everything to help them do their job, wherever and whenever — from displays and docks to power banks and headsets.

When people are enabled by technology that works, they become more immersed in their work, face fewer distractions and interruptions, and increase their productivity. When employees are more productive, so too are companies.

One-stop shop

Conveniently purchase from a single source that offers a wide portfolio of accessories worldwide, backed by world-class service and support.

Better together

Designed, tested and certified to work seamlessly together with Dell systems.

Thoughtful design

Stylish, innovative, functional – our accessories are designed with unique features built-in, to make your life easier and help maximise your productivity.

The era of hybrid work has arrived.

Employees work from multiple environments—from the home to the office to anywhere in between. This has IT leaders wondering how they can ensure their workforce has what it needs to be productive and collaborative across so many spaces. At Dell, we believe the shift to hybrid working models is here to stay, and we want to help you adapt with everything you need to keep connected and comfortable for whatever kind of work you do.

With over 200 branded accessories, Dell knows that modern work requires the tools to help you stay productive and collaborative. We combine hybrid-work ready accessories with intelligent systems and innovative displays to offer customers a comprehensive selection of leading tech for the office, at-home, or anywhere in-between.

Support Your Remote Workforce With the Right Tools to Boost Productivity

New Forrester research commissioned by Dell revealed that users were twice more likely to report a downgrade in productivity following the shift to a new working environment with the switch to a new device, smaller single monitor or laptop screen and lack of their usual accessories.

An easy way to improve employee productivity is to equip laptop users with a monitor, keyboard and mouse so they can see more and work across several applications faster. We recently commissioned a study to figure out if we could quantify those productivity benefits. What we found was that by adding a keyboard and mouse, user productivity increased by nearly 26%, and adding a 27-inch monitor as well, by 38% versus using a laptop alone.¹

With USB Type-C® technology, users can also streamline connectivity between the laptop and their other peripherals via a docking station or monitor, potentially saving up to 20 hours of time wasted annually² on having multiple cables and inefficient connectivity options.

Time savings are just one side of the picture; adding a monitor and external input devices to a laptop also unlocks various benefits on user comfort and reduces fatigue.

Recommendations in summary

Employee safety is a top priority for businesses around the world and many companies will continue offering remote work arrangements for the foreseeable future. With the new research in mind, here are key considerations for decision-makers looking to strengthen employee experience and boost productivity for their remote workforce:

- Provide equipment upgrades and outfit the employee home workspace appropriately as an extension of the office.
- Select the right monitors and accessories for each worker to maximize productivity.
- Revisit space planning in the office to safely accommodate the onset of more virtual meetings, including socially distanced workspaces and modular meeting spaces that allow employees to connect and collaborate with colleagues.

Dell Certified Memory & Storage Upgrades and Flash products

Dell Memory Upgrades

Increase the performance and extend the life of your system with Dell Certified Memory

You could use more memory if...

- You have noticed a decrease in system performance.
- You are looking to extend the life of your system.
- You intend to install a newer operating system such as Microsoft Windows 11.
- You have recently upgraded or installed additional hardware or software.
- You do not have the budget to purchase a new system

Type: DDR4 & DDR5 SODIMM (Non-ECC, ECC), UDIMM (Non-ECC, ECC, XMP)

Frequency: up to 4800Mhz

Capacity: up to 32GB

Limited Lifetime Warranty

Dell Storage Upgrades

Increase the storage capacity with Dell Certified Solid State Drive (SSD).

It boasts a storage capacity of up to 4TB enabling users to store large amounts of data. Featuring PCIe Gen 3x4 & Gen 4x4 interface, these solid state drives deliver enhanced data transfer speed.

Benefits of SSD over HDD (spin drive):

- **More Durable:** Feature a non-mechanical design of NAND flash mounted on circuit boards and are more shock resistant.
- **Faster:** Faster data access, boot ups, file transfers, and an overall quicker computing experience than hard drives.
- **Quieter:** Run at near silent operation unlike loud, whirring hard disc drives.
- **Lighter:** Flash-based SSDs weigh considerably less.
- **Cooler:** SSDs require little power to operate, resulting in less heat output by your system.
- **More Efficient:** Consume less power at peak load.

Dell Flash

USB flash drives allow you to save documents, share photos, music, videos and more.

The combo flash drive has a dual interface that works with both standard USB and USB Type-C™ ports.

It's an ideal way to provide up to 256GB of extra storage for the latest smartphones, tablets, PCs and Mac computers, which may have limited expansion ports, and it's easier than sharing files via online services.

It's plug and play and fast, with speeds up to 100MB/s read and 15MB/s write, and it has a rotating cap to protect the reversible USB Type-C™ connector.

It's backed up by 5 year warranty.
