Services Overview

This service aims at providing a Customer an understanding of the full range of capabilities of the PowerProtect suite of products and services booked through the PowerProtect configurator. During this post-sales engagement, Dell EMC’s technical delivery team discusses with the Customer the relevant PowerProtect components, functionality, and applicability to the Customer’s environment, validates the Customer requirements, validates the required services, and makes recommendations.

In addition, the service enables the DPAD delivery team to have the ability to scope multi-technology deployments as well as set and manage Customer expectations relating to this multi-technology license purchase.

Offer Structure

There are two types of service offers available: Primary Services and Add-on Services.

Primary Services are either associated with the deployment of a specific Hardware Platform recently purchased or for a Supplemental Deployment Service on a hardware platform. Primary services are identified on the Order Form as either Basic Deployment, ProDeploy, or ProDeploy Plus followed by [Hardware Platform Series] or [Base] followed by [additional identifiers] if necessary. For example, ProDeploy Plus Dell EMC PowerMax.

Add-on Services are identified on the order form as "Add-on". Add-ons can be combined with any Primary Service within the same Offer Tier. For example, a ProDeploy Plus Add-on Service can only be combined with a ProDeploy Plus Primary Service. Some Add-on Services may include a list of sub-service options and those sub-services will be chosen by the customer post sale or at the commencement of the project. Add-on Services can be purchased in multiple quantities to cover different sub-services or for multiple quantities of the same sub-service. For additional information about specific Add-on Services, please review the Supplemental Deployment Services Appendix section.

All ProDeploy and ProDeploy Plus services have a planning component. This is designed to gather information about the Customer environment so that successful integration and deployment may take place. It is NOT a substitute for strategic assessment or design services. Those consultative services may be purchased from Dell separately.
