Services Overview

The ProDeploy for Enterprise SONiC service delivers hardware installation and configuration of a single supported Dell PowerSwitch into a new or an existing environment at a single site. This offer provides scalable, agile and reliable open-sourced based network operating system that can extend across multiple sites and out to the edge using containerized architecture.

This service is delivered using a blend of remote and on-site by Dell Technologies (DT) Services resources to complete the installation and configuration or, alternatively, as a ProDeploy Remote for Enterprise SONiC service providing the customer with a guided installation and remote configuration. If a ProDeploy Remote service is delivered, the customer should understand that they are performing the hardware installation and that DT Services will provide some guidance during the physical installation steps to ensure proper installation is completed.

Offer Structure

There are two types of service offers available: Primary Services and Add-on Services.

“**Primary Services**” are either associated with the deployment of a specific Hardware and/or Software Platform recently purchased or for a Supplemental Deployment Service on a Hardware and/or Software Platform purchased in a separate order. Primary Services are identified on the Order Form as either Basic Deployment, ProDeploy, or ProDeploy Plus followed by <Hardware Platform Series> or <Base> followed by <additional identifiers> if necessary. For example, *ProDeploy Plus Dell EMC PowerMax*.

“**Add-on Services**” are identified on the Order Form as “*Add-on.*” Add-on Services can be combined with any Primary Service within the same Offer Tier. For example, ProDeploy Plus Add-on Services can only be combined with ProDeploy Plus Primary Services. Some Add-on Services may include a list of sub-service options and those sub-services will be chosen by the Customer post-sale or at the commencement of the Services. Add-on Services can be purchased in multiple quantities to cover different sub-services or for multiple quantities of the same sub-service. For additional information about specific Add-on Services, please review the Supplemental Services Appendix section.

All ProDeploy and ProDeploy Plus services have a planning component. This is designed to gather information about the Customer environment so that successful integration and deployment may take place. It is NOT a substitute for strategic assessment or design services. Those consultative services may be purchased from Dell separately.
