## Services Overview

The *ProDeploy for PowerFlex rack Upgrade with PowerFlex Manager Automation* service provides expertise to perform *Release Certification Matrix* (RCM) software upgrade for PowerFlex rack system, leveraging the already installed PowerFlex Manager Automation features.

This service is delivered using remote resources for software installation.

### **ProDeploy for PowerFlex rack System Software Upgrade with PowerFlex Manager Automation, Base**

This service provides the activities, tasks, and skills to perform a single, direct validated hop of a *Release Certification Matrix* (RCM) level using PowerFlex Manager in *Managed* or *Lifecycle* mode. Software upgrades are performed on one (1) PowerFlex rack System with up to four (4) customer workload nodes, and includes:

- Planning and preparation.
- An assessment, producing a report for the Customer to remedy the system, ensuring system stability before and after the software upgrade.

## Offer Structure

There are two types of service offers available: Primary Services and Add-on Services.

Primary Services are either associated with the deployment of a specific Hardware Platform recently purchased or for a Supplemental Deployment Service on a hardware platform. Primary services are identified on the Order Form as either Basic Deployment, ProDeploy, or ProDeploy Plus followed by [Hardware Platform Series] or [Base] followed by [additional identifiers] if necessary. For example, *ProDeploy Plus Dell EMC PowerMax*.

Add-on Services are identified on the order form as "Add-on". Add-ons can be combined with any Primary Service within the same Offer Tier. For example, a ProDeploy Plus Add-on Service can only be combined with a ProDeploy Plus Primary Service. Some Add-on Services may include a list of sub-service options and those sub-services will be chosen by the customer post sale or at the commencement of the project. Add-on Services can be purchased in multiple quantities to cover different sub-services or for multiple quantities of the same sub-service. For additional information about specific Add-on Services, please review the Supplemental Deployment Services Appendix section.

All ProDeploy and ProDeploy Plus services have a planning component. This is designed to gather information about the Customer environment so that successful integration and deployment may take place. It is NOT a substitute for strategic assessment or design services. Those consultative services may be purchased from Dell separately.
