WHY LATITUDE 7220 RUGGED?

ULTIMATE FIELD PRODUCTIVITY

The Dell Latitude 7220 is equipped with the **latest generation CPUs** and **enhanced thermal performance** ensuring speedy operations and data-transfer rates. With a **durable active stylus**, and a **Full HD scratch-resistant screen** that is **direct-sunlight viewable and glove-touch capable**, users can experience optimal screen interactivity that stays consistent irrespective of altering ambient conditions. The rugged reliability of the Dell Latitude 7220 has been put to the test with physical shocks and temperature assessments, and it has the independent IP-65 certification for **maximum ingress protection** from dust, dirt and water.

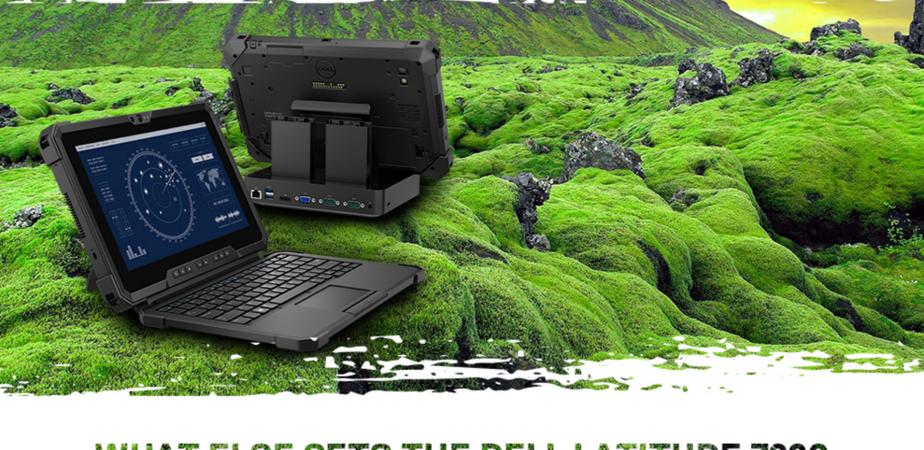

MISSION-CRITICAL CONNECTIVITY

Equipped with FirstNet Ready™[1], the Dell Latitude 7220 gives priority access to high-capacity LTE network and interference-free Wi-Fi connection for **faster video streaming and file transfers**. All-day deployment in vehicles is possible through RF pass-through and GPS root-mounted high-gain antennas that produce **excellent field connectivity**, even while in unsteady motion. USB Type-C support and common docking access all Latitude Rugged devices increases options for new-device access while keeping the ergonomically-designed device lightweight.

ROBUST SECURITY AND MANAGEABILITY

The Dell Latitude 7220 has **integrated security** in the form of an infrared camera with Windows Hello support for **facial recognition** and a next-generation **Fingerprint Reader** for authenticated device access. Dell Technologies Unified Workspace enables the **complete centralized management** of all Rugged devices over the cloud, from deployment to security and workflow-optimized support.

WHAT ELSE SETS THE DELL LATITUDE 7220 RUGGED EXTREME APART?

By employing Unified Workspace, the most comprehensive solution in the industry[2], the Latitude 7220 Rugged Extreme can perform all functions from deployment, security, management and support for virtually all devices, rugged and otherwise, from the cloud.

Its rugged docking solutions are backwards-compatible, allowing your customers to secure their existing investments and ensuring user-friendly reliability.

The Latitude 7220 Rugged Extreme can be delivered to you anywhere, speedily and in bulk.

Rugged Active Pen Nibs (set of five)

IN THE VEHICLE
Vehicle Dock
Keyboards + Input/ Output
Rugged Active Stylus
Rugged Active Pen Nibs (set of five)

A power package to help your customers focus on their business

The Dell ecosystem offers an array of digital technologies, so your customers can achieve better outcomes with new upgrades. **ProDeploy** provides IT options that work for every business model, carrying out deployments from basic hardware installations to planning, configuration and integration of complex systems. **ProSupport** empowers your customers with expert IT support, dedicated responses to critical issues including automated detection, alerts and direct access to skilled engineers. **Dell Financial Services** aids your customers by financing Dell products to enrich their customer experience and delivering online financing services, so they can meet their ambitions today and not when their budgets dictate it.

EXPAND THE HORIZONS WITH YOUR CLIENTS

IOT
Connecting **Dell rugged computing devices** with on-site sensors linked to Dell's IoT gateways that collect large amounts of data out in the field as part of a **complete end-to-end infrastructure** that enables field service personnel to make the shift from **reactive administration to proactive management** in the fast-growing market of IoT.

PRECISION WORKSTATIONS
The Dell Precision Family consists of professional workstations that use superior grade processors and graphics to **execute the most demanding applications** in the industry with exceptional performance. These devices can **develop artificial intelligence** for predictive analysis, **process huge amounts of data** and receive data on all end points, making them the **perfect platform for IoT**.
