POWEREDGE FC640

Flexibility and performance with best-in-class density.

The PowerEdge FC640 delivers powerful performing processors, large memory capacity and highly scalable I/O capability that meet virtualization, server consolidation, scale-out, private cloud or hybrid cloud needs.

Powerful 2-socket modular architecture server
A flexible, two-socket half-height/width compute sled powered by up to two 28-core, Intel® 2nd generation Xeon® Scalable processors, each FC640 supports up to 2TB of DDR4 memory, making it a perfect candidate for dense virtualization environments, software defined storage, databases, HPC, big data analytics, and private cloud workloads. The FC640 storage options include two 2.5-inch drives, with an option of NVMe PCIe SSDs for high performing direct attached storage requirements. The FX2 chassis supports up to four FC640 servers. SDS environment support now includes VMware vSAN with the HBA330 controller.

Innovative management with intelligent automation
The Dell EMC OpenManage systems management portfolio enables peak efficiency for PowerEdge servers, through intelligent, automated management of routine IT tasks. Combined with the unique agent-free management capabilities of the embedded iDRAC9, the FC640 is simply managed, freeing up your time for high profile projects.

- Increase IT data protection and integrity with the embedded security features of iDRAC9.
- Enable collective or individual management of your servers with the Dell EMC Chassis Management Controller (CMC), embedded within the FX2 enclosure.
- Improve IT productivity and agility with OpenManage Enterprise: from bare-metal deployment to ongoing maintenance, and enforcement of IT policies within production environments.

End-to-end server ecosystem and life cycle security
Every PowerEdge server is designed as part of a cyber resilient architecture, integrating security into the full server life cycle. The FC640 leverages new security features built-into every new PowerEdge server strengthening protection so you can reliably and securely deliver accurate data to your customers no matter where they are. By considering each aspect of system security, from design to retirement, Dell EMC ensures trust and delivers a worry-free, secure infrastructure without compromise.

- Rely on a secure component supply chain to ensure protection from factory to the data center.
- Maintain data safety with cryptographically signed firmware packages and Secure Boot.
- Protect your server from malicious malware with iDRAC9 Server Lockdown mode (requires Enterprise or Datacenter license).
- Wipe all data from storage media including hard drives, SSDs and system memory quickly and securely with System Erase.

PowerEdge FC640
- Powered by Intel® 2nd gen. Xeon® Processors Scalable Family
- Perfect for dense ‘anything-as-a-service’ (XaaS) and on-prem environments
- Access to eight PCIe 3.0 slots via FX2S chassis

Dell EMC Server Update Utility  
IDRAC Service Module  
IDRAC REST API with Redfish  
OpenManage Server Administrator  
OpenManage Storage Services |
| Security          | TPM 1.2/2.0 optional  
Cryptographically signed firmware  
Silicon Root of Trust  
Secure Boot  
System Lockdown (requires iDRAC Enterprise and Datacenter)  
System Erase |
| I/O & Ports       | Network daughter card options  
2 x 10GE + 2 x 1GE, 4 x 10GE  
Video card: VGA controller integrated with iDRAC  
PClE: See enclosure specifications |
| Supported operating systems | Canonical® Ubuntu® Server LTS  
Citrix® XenServer®  
Microsoft Windows Server® with Hyper-V  
Oracle® Linux  
Red Hat® Enterprise Linux  
SUSE® Linux Enterprise Server  
VMware vspheres®
