

IDC STUDY: PC AS A SERVICE GAINING FAST ADOPTION BY 2020

IT market intelligence agency, IDC, conducted a global study of 3500+ IT leaders around the world and found that companies at all levels are considering PC as a Service models to reduce costs, shorten refresh cycles and procure better equipment for their employees.

What is PC as a Service?

Dell PC as a Service (PCaaS) combines hardware, software, lifecycle services and financing into one all-encompassing solution – providing a single, predictable price per seat per month provided by Dell Financial Services.**

Market moving to PC as a Service

IT leaders worldwide are recognizing the benefits in speed, savings and productivity that the PC as a Service model can provide to their organization and research indicates that ramp could be quick.

21%¹

of the Commercial PC Market is forecasted to move to a PCaaS model by 2020

Reduce IT Costs

The majority of organizations that already utilize a PC as a Service model are reporting savings across hardware, software and services. This enables predictable budget planning and cost savings at each stage of the PC lifecycle.

Shorten the Refresh Cycle

Current adopters are reporting shorter refresh cycles as compared to standard non PCaaS PC refresh rates, which in turn drives higher productivity and reduced IT effort to manage computing needs.

On average, this group believes PCaaS will shorten their refresh cycle by **8.2 months**¹

Procure Better Equipment

Most organizations report procuring better hardware overall for their employees when utilizing a PC as a Service model. PC as a Service models offer flexible options for management and support, as well as improved security with latest technology.

37%¹
say they now procure better hardware after enrolling in PC as a Service
