# Maximize your Oracle Agile Product Lifecycle Management investment with faster implementation and enhanced business value.

Services for Oracle Agile Product Lifecycle Management

Tap into the power of Oracle Agile Product Lifecyle Management

As a leading product lifecycle management (PLM) application, Oracle Agile PLM provides greater visibility, control and management of the entire product lifecycle — from design and development to launch, servicing and disposal. It enables your teams to collaborate across organizational boundaries on engineering designs, bill of material changes and supplier coordination — as well as management of quality, cost and regulatory compliance issues.

Maximize your investment with Dell Services

Oracle continues to innovate and improve the features and capabilities of Agile PLM. Enhancements and innovations in the latest version of Agile PLM (released in first half of 2013) include:

- Improved compliance engine
- Improved approval matrix
- User experience enhancements: audit screen, enhanced navigation, etc.
- Portfolio management features
- Product cost management and product quality management improvements
- Integration with Oracle Enterprise Data Quality

Whether you want to deploy the base Agile PLM application, upgrade to the latest version, add additional modules, integrate your existing Agile application with a business intelligence or back-office application, or build supporting solutions on top of your existing Agile platform, Dell has the expertise to help you get the most out of your Agile PLM investment.

Get the Oracle Agile PLM expertise you need

In today's competitive environment, it's critical to have an Agile PLM service provider with in-depth product knowledge and a delivery team with both functional and technical experts on the Oracle software stack. You also need a team that can advise you on how to best utilize your Agile PLM software.

Gain tighter control over product quality, use existing product data efficiently and speed time-to-market.

Key benefits:

- Update or deploy Agile PLM with the latest features more rapidly
- Manage your Aglie PLM solution more effectively with expert help from Dell
- Improve your lifecycle management processes with collaboration across your organization
- Integrate engineering processes to reduce new product development time
- Communicate product data and geometry to other applications for testing, simulation, manufacturing, sales and marketing

Dell Services can help

Drawing on the success of our own internal implementation of Oracle Agile PLM, we offer a full suite of services, including:

- Strategic consulting
- Implementation
- Upgrades
- Process improvement
- Custom development
- Integration, testing and support services

We also offer application design workshops, project roadmaps and strategic planning for PLM operations and adoption using the Dell Integrated Solutions Kit (DISK) for rapid implementation and technical enablers for back-office system integrations.

Our business value enhancers maximize your Agile PLM benefits

Dell has developed a number of best practices and business value enhancers to speed implementation. For PLM functions with Dell solution accelerators, we can help you reduce deployment time by up to 50 percent and realize these Agile PLM benefits:
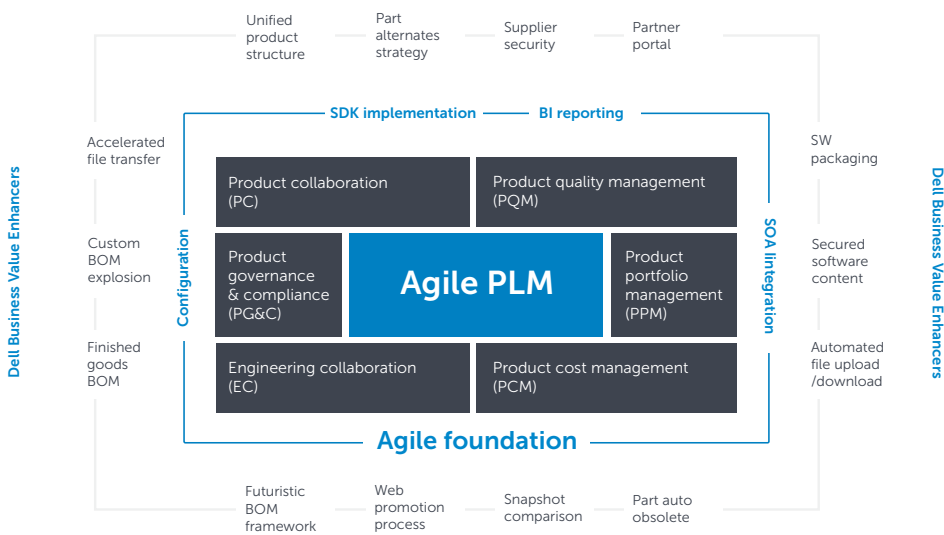

- Improve product collaboration across the value chain
- Increase product planning productivity
- Control quality and compliance from a single source
- Optimize performance with proven processes

Our expertise:

Dell has implemented Agile for its own PLM operations and has in-depth knowledge of Agile capabilities, including:

- **Product collaboration:** Share data securely across the product network
- **Product lifecycle analytics:** Empower decision-makers with accurate, actionable information
- **Product quality management:** Improve product quality and customer satisfaction
- **Product cost management:** Implement a shared bill of materials (BOM) with suppliers
- **Product portfolio management:** Synchronize program and product information, maximize resource utilization and achieve cross-program visibility and decision support
- **Product governance and compliance:** Manage product, substance and material compliance
- **Engineering collaboration:** Help ensure that engineering processes are utilized in the product lifecycle
- **Variant management:** Use a best-practice approach for managing portfolios of related products and product variants
- **Agile integration services:** Extend the Agile suite with back-office applications (EBS, OBIEE, CAD/CAM) and integrate information with downstream applications
