As storage demands expand and processing loads grow, it becomes increasingly more difficult for administrators to achieve maximum performance from their applications. The newest line of Dell PowerEdge RAID Controller cards, built on the LSI® SAS 3108 dual-core PowerPC® RAID-on-Chip (ROC), offer unmatched I/O performance for database applications and streaming digital media environments.

The PowerEdge RAID Controller (PERC) H730P, with eight internal ports, delivers two PowerPC processor cores and a 72-bit DDR3 interface that drives 2GB non-volatile cache memory. Deploy the PERC H730P in hard-drive-based server environments for significant performance gains. To implement hybrid server platforms based on solid-state storage, these next-generation PERCs exploit the potential of solid-state drives (SSDs) for unsurpassed performance and enterprise-class reliability.

Enterprise data protection
Standard support for the most popular RAID levels and accessories, including RAID 5, RAID 6, RAID 50, RAID 60 and NV Cache, further strengthen the data protection capabilities of the PERC H730P. Dell’s NV Cache technology backs up the data to non-volatile memory in a power-loss event and can store it safely for a nearly unlimited period of time.

Intuitive RAID management
Managing the PERC H730P is easy using the integrated Dell Remote Access Controller (iDRAC) with Lifecycle Controller. Without having to deploy an agent, IT admins can configure, deploy, update and monitor the PERC H730P via the GUI or Dell’s CLI (known as RACADM). Additionally, Dell’s one-to-many OpenManage Essentials console allows a user to perform storage operations across multiple servers, including RAID controllers as well as physical disks in the PowerEdge system and external enclosures.

Benefits include:
- iDRAC automatically creates and executes jobs for each storage configuration operation
- Customer can reboot the host OS automatically or schedule reboot for a later date.
- PERC H730P supports real-time RAID monitoring and hardware inventory.

iDRAC incorporates Dell OpenManage™ Storage Services (OMSS) to provide the tools to efficiently manage PERC products, including a pre-boot setup utility and a full spectrum of online RAID management utilities. This suite of applications allows administrators to adjust SAS or SATA topology views from the system host down to the logical and physical drive level. Extending to enterprise deployments, these tools can scale to easily configure, monitor and manage RAID and JBOD volumes locally or over the LAN network.

Dell PowerEdge RAID Controller H730P
Eight-port 12Gbps PCI Express (PCIe) RAID controller supporting 3Gbps, 6Gbps and 12Gbps SAS or SATA hard-disk or solid-state drives.

Eight-port 12Gbps PCI Express (PCIe) RAID controller supporting 3Gbps, 6Gbps and 12Gbps SAS or SATA hard-disk or solid-state drives.
### Feature | PowerEdge RAID Controller H730P technical specification
---|---
**Solution provided** | Eight-port internal SATA+SAS solution supporting 3Gbps, 6Gbps and 12Gbps SAS/SATA hard disk drives (HDDs) and solid-state drives (SSDs)
**Physical dimensions** | 167.6 mm (6.6 in) x 64.4 mm (2.5 in) (MD2 low profile)
**Connectors** | Two internal HD Mini-SAS SFF8643
**Device support** | Up to 255 (SAS, SATA)
**Host bus type** | 8-lane, PCI Express 3.0 compliant
**Data transfer rates** | Up to 12Gbps per port
**SAS controller** | LSI SAS 3108 1200MT/s PowerPC 476 dual-core 12Gbps ROC
**Cache memory** | 2GB 1866MT/s DDR3 SDRAM

#### Key RAID and data protection features
- RAID levels 0, 1, 5, 6
- RAID spans 10, 50, 60
- Non-RAID (pass-through)
- Online Capacity Expansion (OCE)
- Online RAID Level Migration (RLM)
- Auto resume after power loss during array rebuild or reconstruction/RLM
- Check Consistency for background data integrity
- Physical disk power management (Dimmer Switch™)
- 4K native sector support
- Workload profiles
- Support for TRIM/UNMAP Commands for SAS/SATA SSDs
- NVRAM “Wipe” feature protects proprietary data once card is decommissioned
- SED drive support
- Load balancing
- Fast initialization for quick array setup
- Configurable stripe size up to 1MB
- SSD support
- Patrol read for media scanning and repairing
- DDF compliant Configuration on Disk (COD)
- S.M.A.R.T. support
- Global and dedicated hot spare with revertible hot-spare support: automatic rebuild, enclosure affinity, emergency SATA

#### RAID management
- CTRL-R
- Dell OpenManage Storage Services
- Additional management:
  - UEFI (HII)
  - CEM

#### Operating temperature
- Maximum ambient temperature: 60°C

#### Operating voltage
- +3.3V

#### Optional SSD optimization
- Dell FastPath™ firmware feature: delivers high IOPs performance on SSD arrays

#### Operating systems
- Microsoft® Windows Server® 2008 R2 SP1
- Microsoft Windows Server 2012
- Microsoft Windows Server 2012 R1 & R2
- Red Hat® Enterprise Linux® 5.8
- Red Hat Enterprise Linux 6.5
- SUSE® Linux Enterprise Server 10 SP4
- SUSE Linux Enterprise Server 11 SP3

#### Virtualization options
- VMware® ESXi 5.1
- VMware 6.0

#### Warranty
- Up to five-year warranty available for controller (up to the length of purchased system warranty)
- Three-year warranty for battery

**End-to-end technology solutions**

Reduce IT complexity, lower costs and eliminate inefficiencies by making IT and business solutions work harder for you. You can count on Dell for end-to-end solutions to maximize your performance and uptime. A proven leader in Servers, Storage and Networking, Dell Enterprise Solutions and Services deliver innovation at any scale. And if you’re looking to preserve cash or increase operational efficiency, Dell Financial Services™ has a wide range of options to make technology acquisition easy and affordable. Contact your Dell Sales Representative for more information.**
