Understanding network security can be complicated, but ensuring that your network is secure from malicious threats shouldn’t be. Dell™ SonicWALL™ Comprehensive Security Suite (CGSS) removes the complexity associated with choosing a host of add-on security services by integrating all the network security services required for total protection into a convenient, affordable package that turns any Dell SonicWALL network security appliance into a complete Next-Generation Firewall solution.

Available on Dell SonicWALL TZ, Network Security Appliance (NSA) and E-Class NSA, Dell SonicWALL CGSS keeps your network safe from viruses, spyware, worms, Trojans, intrusion attacks and other online threats. As soon as new threats are identified and often before software vendors can patch their software, the Dell SonicWALL security solutions are automatically updated with signatures that protect against these threats and stop attacks before they can make their way into your network, ensuring you have around-the-clock protection. Your Dell SonicWALL solution also has the ability to manage internal access to inappropriate, unproductive and potentially illegal web content with comprehensive content filtering. Finally, this powerful services bundle also includes around-the-clock technical support, crucial firmware updates and real-time reporting capabilities.

Dell SonicWALL Comprehensive Gateway Security Suite includes the following:

- Gateway Anti-Virus, Anti-Spyware, Intrusion Prevention and Application Intelligence and Control* Service subscription
- Content Filtering Service subscription – Premium Edition on E-Class NSA, NSA and TZ Series
- 24x7 Support subscription – E-Class Support 24x7 on E-Class products and Dynamic Support 24x7 on all others

*Application intelligence and control is available on all E-Class NSA Series, NSA Series and TZ 215 appliances.
Features and benefits

A complete network security solution that integrates everything you need for comprehensive protection from threats such as viruses, spyware, worms, Trojans, adware, keyloggers, malicious mobile code (MMC) and other dangerous applications.

Gateway anti-virus, anti-spyware and intrusion prevention provides real-time security against the latest viruses, spyware, software vulnerabilities and other malicious code.

Application intelligence and control* is a set of granular, application-specific policies providing application classification and policy enforcement to help administrators control and manage business and non-business related applications.

Content filtering reduces liability concerns and increases employee productivity by providing the ability to manage access to objectionable or even illegal online content.

24x7 support with firmware updates protects your business and your Dell SonicWALL investment through crucial firmware updates and upgrades, the finest technical support, timely hardware replacement and access to electronic self-help tools.

* Application intelligence and control is available on all E-Class NSA Series, NSA Series and TZ 215 appliances.

Dell SonicWALL secure network

TotalSecure network
CGSS services at a glance

Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention, Application Intelligence and Control Service

- Real-time gateway anti-virus engine that scans for viruses, worms, Trojans and other Internet threats in real-time.
- Dynamic spyware protection blocks the installation of malicious spyware and disrupts existing spyware communications.
- Powerful intrusion prevention protects against an array of network-based threats such as worms, Trojans and other malicious code.
- Application intelligence and control provides application classification and policy enforcement.
- Dynamically updated signature database for continuous threat protection.

Content Filtering Service (CFS)

- Comprehensive content filtering provides control of internal access to inappropriate, unproductive and potentially illegal web content.
- Web site ratings cached locally on Dell SonicWALL network security appliances make response time to frequently visited sites virtually instantaneous.
- Dynamically rate pages that are not in the database and automatically populate the database for future access. Only available in Content Filtering Service Premium Edition.

24x7 Support

- Software and firmware updates and upgrades maintain network security to keep your solution as good as new.
- Around-the-clock access to telephone, email and web-based support for basic configuration and troubleshooting assistance.
- Advance Exchange hardware replacement in the event of failure.
- Annual subscription to Dell SonicWALL’s Service Bulletins and access to electronic support tools and moderated discussion groups.
