

We're passing the savings on to you.

Employee Walkthrough

Step 1: What to do with your coupon code

When you receive your voucher, write it down, print it out or copy your code to enter at the checkout.

Step 2: Shopping for your system

Find the computer system that best meets your needs, and then add it to your basket.

Step 3: Entering your coupon

A screenshot of a web form titled "Coupon Entry". The form has a light gray header. Below the header, there are two options: "Sign in to retrieve coupons from your account" with a blue arrow icon, and "OR" followed by "Enter coupon number" with a text input box. Below the input box is a blue button with a white arrow icon and the text "Apply Coupon". A note below the button reads: "Note: Coupon savings are only applied to items you have added to your basket." At the bottom left of the form is a link for "Coupon Terms and Conditions".

After you have added the system to your basket, enter your coupon code into the "Enter Coupon Number" box below the items in your basket. Next, click "Apply Coupon" and the discount should display in the summary. (Do **NOT** save cart or proceed to checkout unless you are absolutely sure about using your voucher. If you click either of those, it will use up the voucher and you will not get a new one.)

Step 4: Continuing to checkout

After you see your discount has been applied to your system, click "Secure Checkout" to continue to payment.
