

Donate used computer equipment while safeguarding your data.

Dell Asset Donation Service

Promote your brand. Secure your data. Protect the environment.

You can enhance your corporate responsibility programs by donating used computer equipment

We understand this can be an overwhelming undertaking. Some questions many of our customers ask include: "Can anyone really use these PCs? If so, to whom should I donate them and how can I do that in a manner that protects my data? What will ultimately happen when these systems are no longer useful?" We can answer these questions and make it easy for you to help those who can use the technology you no longer need.

We pick up your systems and transport them to our processing site where the data is wiped.¹ From that site we deliver your PCs to the registered charity you chose. Finally, we provide you with a report, validating the donation and data destruction. If for any reason we encounter inoperable disks, we shred them and the computer is recycled in a manner that meets or exceeds local regulatory guidelines such as WEEE.

If you do not have a beneficiary in mind, on your behalf, we will donate your equipment to Camara, a charitable organization which provides affordable refurbished computers to schools in disadvantaged areas in seven countries in Africa, Ireland and the Caribbean. And where there are no schools, they set up eLearning centers using the technology you donate. After 3 years the systems will be recycled in adherence with European regulatory guidelines such as WEEE.

Did you know?

- One computer yields 21 digitally literate children
- There are 67 million children who do not attend primary school
- The Dell recommended donation partner has helped to make 500,000 children digitally literate
