

Dell™ Services IT Consulting for Windows 7 Workshop

A collaborative forum for sharing best practices for your Microsoft® Windows 7 Migration.

Are you ready for Windows 7?

Windows 7 is the most secure, highest quality Windows release to date. The latest operating system features new and enhanced security, performance, and manageability features that translate to cost savings and revenue growth for your business.

To capitalize on the benefits of Windows 7 your environment must be ready for the upgrade. Do you know which applications will need upgrading? Is your infrastructure prepared for the new security features? What does your deployment schedule look like?

Take the next step

We understand every client configuration and customer environment is unique, that's why Dell believes an open forum with some of the industry's most knowledgeable consultants is an important first step in the Windows 7 migration process.

Dell's Windows 7 Workshop is designed to identify issues and begin planning for application compatibility, hardware compatibility, and migration readiness. We want to make your transition to Windows 7 as smooth as possible.

How the Workshop can work for you

During the Windows 7 Workshop we will review application compatibility, hardware compatibility, and migration preparedness. We will also share high-level designs and strategies based on Dell's best practices from the field.

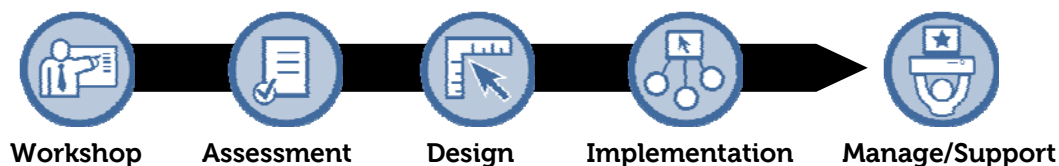

The Dell Windows 7 Workshop is a collaborative, round-table discussion that can help you with the following:

- **Reduce your Windows 7 migration time and mitigate risk.**
- **Understand how to catalog your software titles and identify compatibility issues.**
- **Review the scope of required end-user training plans.**
- **Plan for the impact of Windows 7 data security features on your infrastructure.**

Dell also offers assessment, planning, and deployment services to aid your migration to Windows 7. From early readiness assessments to full migration services, Dell can deploy your new client machines in a complex IT environment or refresh your client assets over a scheduled timeframe with Dell Deployment Services.

Dell Services

IT Consulting for Windows 7 Workshop

Migrate with confidence

Dell was one of the few global services vendors tightly integrated with Microsoft during the Windows 7 development and testing phase, and today, we are involved in a significant number of Windows 7 migrations around the world.

In addition to the half-day Windows 7 Workshop, Dell Services provides a complete set of offerings to help simplify your migration to Windows 7.

Offer	Description
Assessment <i>Make Informed Decisions</i>	• Our 2-4 week comprehensive assessment, uses qualitative interviews and quantitative discoveries and analysis. • Following this engagement, Dell will provide a recommended client architecture and transition plan based on the following: • Business and technology strategies/roadmaps • Unique pain points • An inventory of your applications, including those that are installed but not authorized or approved • Rationalization of the applications to determine which titles and versions are required for the business • A comprehensive diagnosis of application/OS compatibility issues • Total cost of ownership and ROI • Customer readiness
Design <i>Lay the Path for Success</i>	• Determine the application packaging options for titles that will be included in the solution scope (*.msi, *.exe, application virtualization or streaming). • User Acceptance Testing ensures packaging meets the scope of work. • Remediation services address any gaps identified by the UAT. • Final application package delivered for deployment.
Implementation <i>Capture the Value</i>	• Implementation services are provided through on-site consulting or remote Managed Services.

For more information about any of our service offerings, please contact your Dell representative or visit dell.com/services.
