

Air Travel

- Restrictions on the operation of your product may apply while you are on board an aircraft. For example, regulations or restrictions may prohibit the use of any personal electronic device (PED), such as a computer, which has the capacity for intentional transmission of radio frequency or other electromagnetic signals while on an aircraft.
- Please follow the airline's specific instructions as to when the use of a PED is allowed.
- Owners of PEDs should familiarize themselves with the methods to disable/enable the wireless function on their device in order to be prepared to comply with the aircraft restrictions.
- When instructed by airline personnel to discontinue the use of cellular/mobile phones, you should also disable any wireless devices included in your PED.
- Please refer to the Safety Instructions provided with your PED for specific information concerning use of an adapter to power your PED while traveling on board an aircraft.
- When traveling, it is recommended that you not check your PED as baggage. Carry the PED and spare batteries with you in your carry-on bag.
- It is recommended that you use an appropriate carrying case for your PED to provide adequate security and impact protection.
- Each spare battery should be carried in its own protective case, plastic bag, or package to prevent unintentional activation or short-circuiting. Do not permit the contacts of a spare battery to come in contact with metal objects, such as coins, keys, or jewelry. The carrying case should provide adequate protection from crushing, puncturing or impacts.
- When traveling with the storage media removed from the PED, it is recommended that you utilize an approved carrier for the storage media. If you have the storage media checked by hand, be prepared to install the storage media in the PED. It is allowable to put your storage media through an X-ray security scanner.
- When traveling, it is allowable to put your PED through an X-ray security scanner.
- If you have the PED checked by hand, ensure that a charged battery is available in the event that you are asked to turn on the device.
