##### Energy Consumption<sup>1</sup>

Service Level	Energy Consumption (Wattage)	BTU Calculation	Description of Service Level
*Maximum	170	581.4	The system is running programs to maximize the power consumption.
On Mode	60.26	206.0892	The product is connected to a power source and produces an image.
Sleep Mode	0.54	1.8468	The reduced power state the display enters after receiving instructions from a content source (e.g. computer, game console, or set-top box), or via other functions (e.g. timers or sensors). A blank screen and reduction in power consumption characterize this mode. The display returns to On Mode with full operational capability upon sensing a signal from a source or function that can initiate that can initiate the reduced power state.
